

## **Toolmaker (Injection Mould) - Immediate Start**

Birmingham, West Midlands

£negotiable depending on experience + 32 Days Holiday + Pension

Permanent Days Mon-Thurs, or shift/s to suit busy 24/7 operation + Plenty of overtime

### **The Role:**

As an Injection Mould Toolmaker, you will be responsible for the on time & accurate delivery of tools to meet tooling programmes safely and efficiently carrying out manufacture preparation, assembly, fitting, and repair of both new and existing tools.

### **Daily duties and responsibilities will include:**

- The manufacture, construction, maintenance and repair/refurbish of plastic, thermoset, and compression mould tools to a high-quality standard.
- Fault finding, tool approval and modification of new and existing tooling
- Attending machine/tooling breakdowns to identify the root cause and solve the problem
- Work as part of a team to ensure cell targets for delivery, quality and efficiency are met.
- Work in accordance with Health & Safety regulations, department procedures and company policy.
- Maintain and update relevant documentation.
- Handle lifting equipment
- Monitor and maintain high standards of housekeeping.
- Undertake Training if required.

### **Experience / Requirements:**

The ideal candidate will be time served and have proven experience as a Toolmaker, ideally within the plastic injection or compression mould industry, with a forklift and/or overhead crane driver license.

- Proficient in the use of machinery such as lathes, drills, grinding, milling, spark eroding & CNC machines etc.
- Ability to interpret requirements & communicate with the management team
- Use of precision measurement instruments such as micrometres, gauges and vernier callipers
- Experience working with multi core and cavity tooling
- Ability to work independently as well as contributing to team and companywide strategy.
- Good bench hand skills
- Confident with detailed drawings
- Computer literate and highly proficient in use of CAD and Office applications
